Zephyr's Atelier-Remote
Front-end developer, July 2022-present

- Converted UI and prototypes into responsive web designs
- Worked in a team of 2 developers
- Consumed API on a large scale
- Worked with state management like Redux and ReduxToolkit

PROJECTS

- Space-tourism: A frontendmentor challenge about space. With my knowledge of API and tailwindcss, I could implement the design in react.
  https://dewaley-space.netlify.app/
- Coin tracker app: I built a react app with tailwindcss that tracks coins and draws a graph on each coin's progress over time.
  https://dewaley-coin-tracker.netlify.app/
- Pixabay Image gallery app: A react app with tailwindcss that searches for images while consuming Pixabay's API.
  https://dewaley-image-gallery.netlify.app/
- Weather app: A react app with tailwindcss that can search for any town and get the weather while consuming OpenWeatherMap's API.
  https://dewaley-weather-app.netlify.app/
- Task Tracker app: A task tracker with ReactJs. It was a coding challenge from frontendmentor. https://dewaley-task-tracker-app.netlify.app/
- Calculator app: I built a calculator with ReactJs.
  https://dewaley-calculator.netlify.app/
- Tictactoe app: I built a tictactoe app with ReactJs.
  https://dewaley-tictactoe-app.netlify.app/
- Github search app: I created a Github search app with ReactJs..
  https://dewaley-github-search-app.netlify.app/
